PROJECTS

Employee Payroll System | Core Java, OOPS, MySQL.

An "Employee Payroll Management System" project aims to develop a software application that automates the process of calculating and managing employee salaries, including tracking working hours, calculating taxes and deductions, generating pay slips, and maintaining employee details, ultimately streamlining payroll operations within a company and minimizing manual errors by centralizing data in a digital platform.

Canteen Management System | Core Java, MySQL.

Canteen Management System is a Java standalone application which makes it easy for the customers/users to select the type of food they want to take. The system provides the feature to edit, add, delete and select the food item of their choice, also there is no security issues because every user holds a unique username with its password.

TECHNICAL SKILLS

Programming Languages: C, C++ , Java

Frontend Tech : HTML

Backend and Database : MySQL, Advance Java

Developer Tools/ Version Control : Eclipse, IntelliJ Idea ,VS Code , Git , Github

Course Fundamentals: Data Structure and Algorithm, OOPS Concept, Software Engineering

CERTIFICATIONS

Java With DSA and System Design- Apna College

Internship at Codsoft and CipherByte.

HOBBIES AND INTERESTS

Playing Sports, Cooking, Listening music and

Volunteer Work and Community

Involvement.
